darccstars@protonmail.com | Keningau, Sabah | GitHub | Behance | My Website

EDUCATION

Raffles University, Johor Bahru

2022 – 2024

Diploma in Digital Game Art | **Cumulative Grade Point Average: 3.13**

SKILLS

Languages C#, HTML, CSS

Frameworks Unity Engine, Godot

Tools GitHub, VSCode, VSCodium, DaVinci Resolve, Handbrake, Blender, Audacity

Courses Creative Programming, 3D Modelling, Audio Visual Compositing, Rigging & 3D Animation
Character Design & Development, Game Production, Game Design Principles, Critical Game Studies

EXPERIENCE

TheOneDesign | *Freelance Game Developer Intern*

Jan 2024 – April 2024

- Creating prototypes and choosing the best version to work to build upon.
- Working together with the creator in converting his physical prototype into a digital game for ease of access.
- Created 3D models for playing pieces themed after animals including the playing area.
- Ensure that the game is running stable including having mobile controls for Android devices.

PROJECTS

2026 P Redesign | *3D Modelling Project*

[View]

- Utilized Blender's shader editor to generate procedural generated textures (e.g. edgewear & weathering).
- Designed with Blender extensions' Ucupaint for in-program texturing & Retarget for animation retargeting with sample animations from Mixamo.com

SteelMongers | *Third-person mech action game*

[View | Github]

- Utilize an IK-system which allows character models to move & rotate bones while an animation is playing.
- Integrated Unity's Universal Renderer Pipeline(URP) to leverage Unity's shader graph & implement additional screen effects (e.g. Screen Space Ambient Occlusion)

Catnap | *Interactive space adventure game*

[View]

- Implemented a dialogue system with differing choices & differing outcomes.
- Integrated animation layers which enables differing body parts of a character to play seperate animations (e.g. Character's torso plays an aiming animation clip while the pelvis plays a running animation clip).

POSITIONS OF RESPONSIBILITY

Mewmewstudios, Catnap | *Project manager & Programmer*

Jan 2023 – March 2023

- Collabed with five other designers, overseeing development of game and ensuring it is stable & running,

Deep Sea Voyage | *UI/UX controls for Android Programmer*

Jan 2023 – March 2023

- Collaboration with a digital artist on creating an educational underwater exploration game, ensured that game is able to be played on both Pcs and Android devices.

Wings of Orion | *Game designer*

Sept 2022 – Nov 2022

- Duo project with a pixel art designer, assisted in detailing background stories of colleague's designs.

CERTIFICATIONS

- Completion of Diploma in Digital Game Art
